Make the most of incoming mail

Incoming mail is very important in any business, however it can also be complex and time-consuming. Invoices, payments and correspondence arrive daily and can easily stack up.

Efficient handling of incoming mail is a simple way to improve profits and customer satisfaction:

- Save staff time through automation
- Speed up document distribution, processing and filing
- Respond quickly to customer sales orders, invoice queries, complaints
- Cut document storage costs

Smarter processing

Integrate Quadient letter openers and electronic document management software to handle incoming mail in a seamless process. Envelopes are opened quickly and contents scanned to digital files to allow capture of key information, rapid distribution, on-line processing and reliable archiving and retrieval.

Fast-start document processing with a Quadient letter opener:

- Quickly slices the envelope edge to allow easy extraction
- Handles mixed mail without need for pre-sorting
- Opens envelopes without damage to contents

Milling cutter technology

The IM-22 and IM-27 both utilise modern milling technology which precisely slices one edge of the envelope without damage to contents.

No need for pre-sorting

Quadient letter openers handle the most commonly used envelope formats and sizes so there is no need to pre-sort your envelopes.

Which one is right for you?

IM-22

- Up to 32,000 letter openings per hour*
- Separate catch tray
- Smaller and lighter

IM-27

- Up to 36,000 letter openings per hour*
- Reverse conveyor for easy stacking of larger mail volumes
- 1,000 items can be stacked beneath the input feed

Very quick and easy to use

The fast, convenient and secure solution to open your incoming mail

IM-22 and 27 are heavy duty letter openers that can open over 10 envelopes per second, so they are ideal for users who deal with high mail volumes. The multi-function touch screen means both machines are very easy to use.

- Maximum envelope thickness 6mm
- Multi-Function touch screen
- Controls multiple feed and counting modes
- Mixed Thickness Separator
- Manages the flow of mixed mail for optimal cutting performance
- Accurate counters

* The above are the speed at which the machine 'can' open at normal operating speeds and monthly volumes are lower.
