

เครื่องเขย่ากระดาษ Paper Jogger

AJ-700 / AJ-740i

Neat jogging rapidly achieved with the powerful air blower.

Thanks to the high-power air blower, which is the most powerful in its class, the AJ-700 & AJ-740i reliably jogs unevenly arranged papers very quickly.

It prevents the paper from becoming soiled by blowing air between the sheets.

Wet ink can be rapidly dried by the effect of the air, which is even more effective in the case of two-sided printing. It is also effective for elimination of static electricity and powder stayed on the paper after printing.

Jogging strength and air volume are adjustable according to paper quantity and quality. In addition, the AJ-700 & AJ-740i can operate in various modes such as air only, jogger only, reset timer operation and the time interval difference mode (continuous jogging for a preset period after the air has stopped).

Model name	AJ-700	AJ-740i
Maximum paper size	320 x 450 mm (12.6" x 17.7")	
Minimum paper size	128 x 187 mm (5.0" x 7.3")	
Loading capacity	800 sheets of 64 g/m2 paper	
Thickness of the tray	100 mm (4.0")	
Jogging system	Vibrated by eccentric balanced weight	
Air blowing system	By air blower	
Anti-static system	None	By anti-static ionizer
Power source	120 VAC (3A), 50/60Hz single phase	
Power consumption	720W	725W
Net weight	35kg	39kg
Dimensions	460(W) x 395(D) x 1,025(H) mm	
Standard accesories	A4 / Letter size tray, A3 / Ledger size tray, Foot switch
